representatives; as well the comments and suggestions made by the Accreditation Committee members, the Committee stated the following:

1. The institution generally ensures the essential conditions for the **credible award of qualifications**. Since the previous accreditation, the institution has implemented targeted measures to enhance its educational processes, particularly through the review and clarification of academic programme (AP) structures, the formulation of learning outcomes and the improvement of assessment mechanisms. The key documentary and procedural foundations of the internal quality assurance system have also been established. Positive developments have also been observed in the organisation of student support, the expansion of cooperation with stakeholders, and initiatives related to external relations and internationalisation. These developments contribute to the enhancement of the teaching quality and strengthening of trust in the reliability of learning outcomes.

2. Meanwhile, the strategic management and the QA system are still in the stage of formation and do not yet operate fully as **systematic, data-driven management tools**. Consequently, the QA system currently functions primarily as a separate activity rather than as an integrated, evidence-based mechanism embedded in institutional governance.

3. At the next stage, the institution should focus on a more systematic approach to its governance and development processes through:

- the development and approval of a sustainable financial model that reduces dependence on tuition fees and establishes clear mechanisms for the attraction of alternative sources of funding;
- the introduction of a long-term financial planning based on clear revenue and expenditure projections and development priorities;
- the development of a concrete infrastructure plan to ensure adequate space for teaching and practical training, with clearly defined timelines and responsibilities.

Taking into consideration the above mentioned, as a result of an open voting, the Accreditation Committee:

DECIDED

1. To award institutional accreditation to the "Grigoris" Medical-Humanities College for 4 /four/ years.
2. After the publication of the decision on accreditation award, to submit a revised follow-up plan based on the expert panel report and respective time schedule to ANQA within two months. The plan should be approved by the institution's Governing Council, considering the need to give urgent solution to the issues identified in Points *1, 2* and *3*.
3. In accordance with the requirements set by point 12 of the Statute on State Accreditation of Tertiary Level Institutions and their Academic Programmes, every 2 /two/ years to submit a written report to the ANQA on the results of carried out activities by ensuring the evaluation of enhancement of the TLI's activity, innovations and achievements. The evaluation results should be discussed at the institution's Governing Council.
4. To assign the ANQA to carry out mandatory monitoring of the effectiveness of the TLI's activities in accordance with the KPIs.
